

Trisha Rajesh

Fremont, CA 94539 | (510)-945-8322 | trisharajesh23@gmail.com

SOFTWARE ENGINEER

I'm a Software Engineer with strong foundations in data structures, algorithms, operating systems, and systems programming, backed by hands-on experience building full-stack and mobile applications at scale. I thrive in fast-paced, collaborative environments where I can solve complex problems with clean, efficient code.

SKILLS

Languages: Java, C, C++, Python, JavaScript

Frameworks & Tools: React Native, Angular, Node.js, MongoDB, TensorFlow, Git

Systems & CS Fundamentals: Data Structures & Algorithms, Operating Systems, Memory Management, Multithreading, File Systems

Other: Mobile App Development (iOS), NLP & Data Annotation, UI/UX Collaboration, Technical Leadership, Mentorship

EXPERIENCE

Spotidol, Remote

Full-Stack Developer Intern, May 2020 – May 2022

Served as an intra-corporate Oracle purchasing expert, developing solutions for several company divisions.

- Contributed to the development of the Spotidol Competitions iOS application, a platform enabling artists and performers to participate in competitions while allowing users to vote on photo and video submissions.
- Implemented a competition search feature, improving discoverability and user navigation within the mobile application.
- Developed features for an iOS application called Dreams, a social platform that allows users to create, share, and collaborate on personal goals and aspirations.
- Supported end-to-end feature development across the stack using React Native, Angular, Node.js, MongoDB, and TensorFlow.
- Collaborated with designers and engineers to enhance user experience and interface design.
- Led and mentored a small team of interns, coordinating UI design efforts and contributing to UX improvements.

Technologies: React Native, Angular, Node.js, MongoDB, TensorFlow

Docuvision, Berkeley Skydeck, CA

Natural Language Processing Intern, June 2019 – August 2019

Provided functional and technical support to hundreds of end-users of Oracle Applications and Ariba ORMS systems.

- Assisted with data preparation and annotation by reviewing documents to identify and flag personally identifiable information (PII).
- Supported the training and evaluation of an NLP-based redaction system by validating the accuracy of automated data masking.

ADDITIONAL RELEVANT EXPERIENCE

UW-Madison, Madison, WI

Girls Who Code Board Member, January 2023 – Present

- Organized events to encourage women in technology to engage in collaboration, networking and community.
- Led educational sessions on web development, Python, and resume-building for members.

Tech Girls United, Remote

Curriculum and Development Board Member, August 2020 – May 2022

- Designed and taught workshops in data science, web development, and AI.
- Created beginner-friendly content to empower girls from diverse backgrounds in tech.

National Youth Entrepreneurial Competition (NYES), Bay Area, CA

Event and Programming Lead, March 2020 – July 2020

- Drafted competition guidelines, schedule proposal and judge's rubric.
- Coordinated speaker outreach and managed digital resources for participants.

The Amal Foundation, Remote

Partnerships and Implementation Officer, January 2020 – May 2022

- Volunteered in a nonprofit that aims to provide educational opportunities to underprivileged students in Lebanon.
- Initiated and maintained partnerships with 10+ global education nonprofits.

PROJECTS

Memory Allocator – C | CS 354: Machine Organization

- Implemented a custom dynamic memory allocator supporting splitting, coalescing, and best-fit placement strategies.

Thread Scheduler – C | CS 537: Operating Systems

- Created a thread scheduler using pthreads that manages how tasks are prioritized and executed in parallel.

File System Simulation – Java | CS 400: Data Structures

- Created a basic file system with hierarchical folders and files, implemented using tree structures and hash maps.

EDUCATION

Bachelor of Science (BS), Computer Science, Spring 2026

University of Wisconsin–Madison, WI

Bachelor of Science (BS), Psychology, Spring 2026

University of Wisconsin–Madison, WI

PROFESSIONAL DEVELOPMENT | TRAINING

Relevant Completed Coursework:

- Object-Oriented Programming (CS 300)
- Advanced Data Structures (CS 400)
- Machine Organization and Programming (CS 354)
- Introduction to Algorithms
- Introduction to Artificial Intelligence
- Introduction to Discrete Mathematics
- Elementary Matrix & Linear Algebra
